Seat height 48 cm

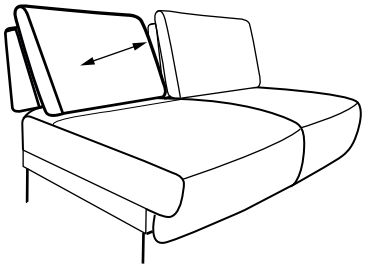
If the seat height is not specified,
we confirm the standard version: 46 cm

Please state all relevant data for the model description on every order! Standing in front of the sofa, beginning on left (please include a sketch)

The seam processing or the need for additional / modified seams can differ in the comparison between the fabric / leather version. Wrinkling is a normal process. This does not constitute grounds for complaint, rather is determined by the model and is a typical property of the goods.
All dimensions are approximate and may differ slightly. Versions of the models shown as well as sketches are non-binding and may be altered. We reserve the right to make technical changes to our products. The same applies to price errors. The decisive factor is the current status of the collection.
The dimensions of the bed area (if there is a bedfunction in the type plan) are given in combination with a sideways bed function with armrest and tapered corner (SE) and change slightly in combination with other types. As wood is a natural product, possible colour differences or grain cannot be influenced and do thus not constitute grounds for any complaint. The comfort of the seat may vary in individual elements due to the construction. This is caused by a change in the seat structure and does not constitute a quality deficiency.
Notes for pacemaker wearers: All the electric motors integrated comply with DIN and VDE specifications. We recommend consulting your doctor to prevent any problems.

Description of functions

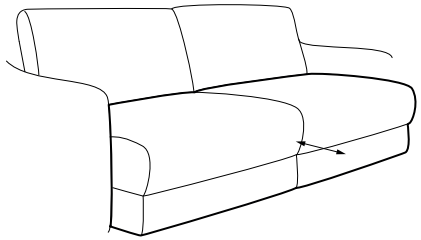
Seat depth adjustment with back inclination (STN) - with surcharge



By slightly lifting and sliding the back cushion, you create a further seat depth. During this movement, the back angle opens slightly at the same time.
In the particular (per) Type only complete and not individually orderable. You need a wall clearance of 22 cm for the STN function.

Seat depth adjustment and ... MoLi together in one type not possible!

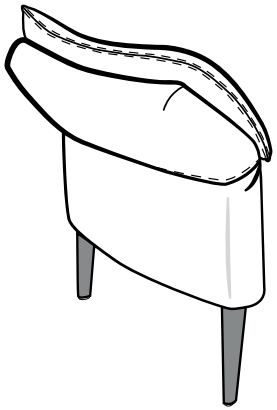
Pull-out bench with motor (VZMo) - with surcharge



The seat can be pulled out forward individually, motorised approx.19 cm.
Touch button operation

VZMo and STN not possible in one type!

Bed armrest (LAL) - with surcharge



possible in all elements with armrest.
Except the armchair.

Battery for motorised function - with surcharge

for wireless function per seat,
only in conjunction with CanMoLi + VZMO possible
2,2Ah Li-ion

Hand switch (HS) - with surcharge

for motorized operation,
only possible in seats with armrests and in connection with VZMO;
CanMoLi is always with hand switch without surcharge.
